

## SLIM AND STYLISH.

Designed for the way you live, the Phoenix Evara brings powerful, dynamic sound into a refined, space-conscious form.

Perfect for both music and movies, it fills your room with energy and detail, whether you're entertaining, unwinding, or simply enjoying everyday moments at home.

Its slim profile and contemporary finishes allow it to blend effortlessly into your space, while its performance ensures it never fades into the background.

For the ultimate sound experience at home, play it through Krix.

Phoenix Evara in Studio Navy

### Room-filling sound

Fills your space with dynamic, engaging sound for both music and movies, from everyday listening to immersive experiences.

### Slim, modern design

A refined, space-conscious form that complements contemporary interiors.

### Made for modern living

Ideal for living rooms, open-plan spaces and media rooms, delivering powerful performance in a compact footprint.

### Australian made

Krix has proudly engineered and manufactured speakers in Australia since 1974.

PHOENIX ERAVA

| PHOENIX ERAVA         |                                                                                                                                                                                                      |                 |                                                     |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-----------------------------------------------------|
| Frequency range       | 35 Hz - 40 kHz (in room response)                                                                                                                                                                    | Enclosure type  | Bass reflex, with internal X bracing                |
| Power handling        | 50 - 200 Watts RMS recommended amplifier power                                                                                                                                                       | Vent location   | Rear                                                |
| Sensitivity           | 91 dB (2.83V / 1m)                                                                                                                                                                                   | Input terminals | Dual bi-wire binding post (bi-wireable, bi-ampable) |
| Impedance             | Nominal 6 Ohms (Minimum 3.5 Ohms)                                                                                                                                                                    | Dimensions      | 950mm high x 195mm wide x 295mm deep                |
| Configuration         | D'Appolito, 2-way                                                                                                                                                                                    | Net Weight      | 18kg                                                |
| Low frequency driver  | Dual nominal 165mm (6½") laminated polypropylene cone. 33mm (1¼") voice coil wound on high powered aluminium former, with ventilated spider and aluminium flux stabilization ring for low distortion |                 |                                                     |
| High frequency driver | 26mm (1") dual concentric diaphragm with wave-guide centre plug for controlled directivity. Non-reflective dual chambered magnet structure with copper shorting ring to lower distortion             |                 |                                                     |

## EVARA FINISHES

|                                                                                    |              |                                                                                     |                 |                                                                                       |             |
|------------------------------------------------------------------------------------|--------------|-------------------------------------------------------------------------------------|-----------------|---------------------------------------------------------------------------------------|-------------|
|  | Studio Black |  | Studio Charcoal |  | Studio Navy |
|  | Studio White |  | Studio Green    |                                                                                       |             |

## GRILLE COLOURS

Studio White is paired with a Mid-grey grille.  
 All other finishes (Studio Black, Charcoal, Navy and Green) feature a Charcoal grille.
