

SC2-100

SYSTEMS INTEGRATION AMPLIFIER 2-CHANNEL BRIDGEABLE POWER AMPLIFIER

SC2-100

Offering the classic SpeakerCraft power and stability that you've come to know and trust, the NEW SC2-100 brings extremely high current power to a custom installed A/V System in a remarkably convenient way. Featuring audio circuitry constructed using the finest materials available, including 1% metal film resistors, high quality capacitors and oversized heat sinks that ensure proper cooling without the need for a noisy fan. This 2-channel amplifier provides 100W per channel (400W when bridged) and an independent level control that makes installation easier and more straight forward than ever before.

FEATURES & BENEFITS

- **Real World Power:**

The SC2-100 delivers 100 watts per channel at 8 ohms and 200 watts per channel at 4 ohms. You'll get tremendous bass and dynamics from every pair of speakers connected.

- **Turn-On Modes:**

The SpeakerCraft SC2-100 Amplifier features three turn-on modes: 1. Music Sense, 2. External Voltage Trigger, 3. Manual Turn-On via the front panel switch. You can configure the SpeakerCraft SC2-100 Amplifier to interface with any kind of system and have the unit automatically turn on.

- **Bridged Mode:**

The SpeakerCraft SC2-100 Amplifier can be operated in a bridged mono configuration. In this configuration, the SC2-100 delivers 400 watts. Bridged mode is perfect for sub-woofer, rock speakers or any applications requiring high power output.

- **Independent Level Controls:**

Each amplifier channel features an independent level control enabling precise volume matching to the rest of the system. These level controls can also limit volume to prevent abuse of the system.

- **Freedom from Fan Noise:**

The oversized heat sinks inside the System Integration Amplifiers allow the amplifier circuitry to stay cool even when operating into low impedance loads without the distracting noise created when using fan-cooled amplifiers.

- **Current for Reactive Loads:**

The high current design of the SpeakerCraft SC2-100 Amplifier assures that even unusual and reactive loads are handled with ease. Cutting edge digital power supplies provide more than ample current to your system.

- **Freedom from Cross-Talk:**

Each channel of the SpeakerCraft SC2-100 Amplifier is powered via its own independent power supply. This increases the isolation between channels and eliminates cross talk, guaranteeing you absolute silence as the backdrop to your music.

- **Control Output:**

A 12 Volt DC output is provided whenever the amplifier is on, allowing you to operate voltage triggered devices like motorized screens and curtains.

FEATURES:

- Digital, high current bridgeable stereo amplifier
- Independent level controls
- Auto switching 110V-230V power supply
- Three turn-on modes: music sense, voltage trigger, and manual
- Voltage trigger input accepts 3-24VAC/DC
- Audio circuitry constructed with the finest parts available, including 1% metal film resistors, high quality capacitors and oversized heat sinks for clear and uncolored sound

SPECIFICATIONS:

- 100 watts RMS per channel into 8 ohms (all channels driven)
- 220 watts RMS per channel into 4 ohms (all channels driven)
- Channels are bridgeable to 400 watts RMS into 8 ohms
- Total Harmonic Distortion: 0.2% THD from 20Hz to 20kHz
- 12-volt control out
- Detachable power cord
- Two year limited warranty
- Rack mount ears included
- Tested and certified to US, Canada, EU, and Australian safety and EMC standards
- Power requirement:

o 100-120 / 220-240 V~, 50/60 Hz, 300 W

- Overall dimensions:

o 17 1/4" (43.81 cm) wide – 2 1/4" (5.6 cm) high
(including feet)

o 13 1/2" (34.35 cm) deep

- Weight: 10.8 lb. (4.9 kg)
